Date	30 September 2026
Team ID	6ab3ed08a238dc999eb3fda5
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Customer problem statements for the AI-Powered Personalized Study Assistant, written from the customer's point of view using the "I am / I'm trying to / But / Because / Which makes me feel" format.

Problem Statements:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An engineering college student preparing for semester exams.	Study the syllabus efficiently and understand difficult topics.	The available notes, videos and books are generic and don't match my level or pace.	There is too much scattered content and no personalised guidance on what to study first.	Overwhelmed and anxious, but hopeful about a personalised tool.
PS-2	A working professional learning a new skill after office hours.	Learn quickly in the limited time I have each day.	I can't tell which resources are relevant or how much I've actually learned.	Courses are one-size-fits-all and give no feedback or adaptive study plan.	Frustrated and demotivated about keeping up.

Reference: PS-1 is based on the persona Priya Sharma from the Empathy Map.
