Project Name	Script-Controlled ACL - Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map

An empathy map for a college student using a study assistant, viewed from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem the project addresses: struggling to study efficiently with generic, one-size-fits-all resources.

SAYS

- "I have too much to study and no idea where to start."
- "These notes and videos are too generic for me."
- "I wish someone could explain this in a simpler way."

THINKS

- "Am I falling behind my classmates?"
- "There must be a smarter way to revise than re-reading."
- "Will I be able to score well in the exams?"

PRIYA SHARMA

(The person name)

DOES

- Watches multiple YouTube videos and switches between many apps and PDFs
- Makes handwritten notes and last-minute revision plans
- Asks friends or seniors for help and postpones difficult topics

FEELS

- Overwhelmed and stressed by the syllabus load
- Frustrated when content doesn't match their level
- Anxious before exams, yet hopeful about a personalised tool
