Script-Controlled ACL – Restrict Record Access Based on Field Value

Phase 8-Project Demo Planning

Date	30 September 2026
Team ID	6ab3ed08a238dc999eb3fda5
Project Name	Script-Controlled ACL - Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning

Project Demo Planning:
A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the Script-Controlled ACL project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

1. Demo Sections & Member Responsibilities

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	User & Role Setup (Milestone 1)	Demonstrate EEE User creation and role assignment (bb1, bb2, bb3, bb4).	3	Team Member 1
2	Table & Data Creation	Show u_institution_details table schema, fields, and records across ECE, EEE, and CSE branches.	4	Team Member 2
3	Read ACL Implementation	Explain Read ACL logic, script validation, and impersonation test	5	Team Member 3

		(EEE user vs non-EEE vs Admin).		
4	Create & Write ACL Demo	Demonstrate Create (bb2) and Write (bb3) permissions via field updates and New button visibility.	4	Team Member 1
5	Delete ACL Verification	Show Delete (bb4) ACL execution, record selection, and confirmation workflow.	3	Team Member 2
6	Summary & Q&A	Summarize record-level security benefits and answer evaluation questions.	3	All Members

2. Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Overview of ServiceNow record security & requirement to restrict record access by Branch field.
2	Solution Overview	Architecture of script-controlled ACLs combining User Roles (bb1-bb4) & Data Conditions.
3	Live Feature Demonstration	Step-by-step walkthrough of Read, Create, Write, and Delete ACLs in ServiceNow instance.
4	Q&A Session	Addressing security evaluation, elevated role privileges (security_admin), and portal security questions.
